ABOUT

Dynamic Software Engineer with experience delivering innovative software solutions as a key developer, team lead, and scrum master. A passion for software design and back-end development drives me to consistently deliver high-quality results that meet client needs and exceed expectations.

With a focus on scalability and performance, I have a proven track record of delivering projects on-time and within budget while continuously striving to improve processes and increase efficiency. My exceptional collaboration skills and proactive approach have earned me recognition as a valuable team player, always willing to lend a hand and contribute to finding the best solution.

As a lifelong learner, I am eager to work in a dynamic environment where growth and development are promoted. I am confident in my ability to lead cross-functional teams and deliver results that drive business success.

EXPERIENCE

- **BestSecret** Malaga, Spain
Senior Software Engineer Apr 2022 – Present
Webshop: Working on a customer engagement team in charge of the home page and the games.
 - Techs: Java, Kotlin, Hybris, Vue.js, GraphQL, Git, Microservices, Spring Boot, Redis, PostgreSQL, MongoDB, Prometheus, Docker, Kubernetes, Azure
- **Epam** Malaga, Spain
Lead Software Engineer Feb 2019 – Apr 2022
Iron Mountain: Worked as a full stack developer on Cognitive Workbench, a highly customizable tool to extract, process and transform information from digital documents.
 - Techs: Java, Angular, TypeScript, Git, Microservices, Spring Boot, Spring Data, Redis, PostgreSQL, MongoDB, Prometheus, Docker, Kubernetes, Google Kubernetes Engine (GKE), Google Cloud Platform (GCP)**Corelogic:** Played a key role as a developer in the creation and upkeep of services that generate mortgages and real estate reports for multiple applications. Coordinating with cross-functional teams to drive new releases, resolve issues, and conduct investigations while ensuring smooth operation of these critical services.
 - Techs: Java, various relational DBs, Redis, Pivotal Cloud Foundry
- **Infor** Buenos Aires, Argentina
Senior Software Engineer May 2014 – Jan 2019
Connect: Developed a highly customizable middleware to seamlessly integrate internal and third-party services, culminating in a successful migration from a monolithic application to a microservices architecture.
 - Techs: Java, Spring Cloud ecosystem, Swagger, Docker, AWS**Data Import:** Developed a data ingestion application for stores, which involved rewriting the existing approach to create a more scalable and efficient solution. The resulting application is capable of handling large volumes of data with ease and has greatly improved the data ingestion process.
 - Techs: Java, Spring Batch, Postgres, Cassandra/Solr, Apache Camel
- **Devspark** Tandil, Argentina
Software Engineer Jul 2012 – May 2014
- **Globant** Tandil, Argentina
Quality Software Engineer May 2011 – Jun 2012

TECHNICAL SKILLS

- **Languages:** Java, Kotlin, Bash, Python, Javascript
- **Frameworks/Tools:** Spring (IOC, MVC, Boot, Data), Hibernate, Apache Camel, Kafka, Angular, Vue.js
- **Databases:** Postgres, MySQL, Cassandra, MongoDB, Solr, Redis
- **Cloud:** Azure, GCP, AWS, Pivotal Cloud Foundry

EDUCATION

- **UNICEN**

Tandil, Argentina

Bachelor of System Engineering

2006 – 2011

Relevant courses: Service Oriented Computing, Introduction to Grid Computing, Information Retrieval, Agile Methodologies, Aspect Oriented Programming, Web Tools, Evolutionary computation.
